

Form VIII AutoFill Setup Guide

Everything you need to install the extension, run your free trial, and get help if something goes wrong. Roughly five minutes from start to finish.

Version 2.0.8 Google Chrome / Microsoft Edge toolhavenhub.com

Before you start

You need Google Chrome or Microsoft Edge on a Windows or Mac computer, and the ZIP file you downloaded from our website. That is all. There is nothing to buy yet — the first seven days are free and no card details are asked for.

Part 1 — Installing it

1 Unzip the folder

Right-click `ToolHub-FormVIII-v2.0.8.zip` and choose “Extract All”. Keep the extracted folder somewhere permanent such as Documents. Do not leave it inside Downloads, because deleting it later will break the extension.

2 Open the extensions page

Type `chrome://extensions` in the address bar and press Enter. On Edge the address is `edge://extensions`.

3 Turn on Developer mode

There is a small switch in the top-right corner of that page. Switch it on. Three new buttons will appear along the top.

4 Click “Load unpacked”

A file browser opens. Select the folder you extracted in step 1 — the one that directly contains `manifest.json`. Select the folder itself, not any file inside it.

5 Pin it to the toolbar

Click the puzzle-piece icon beside the address bar, find ToolHub in the list, and click the pin. The icon now sits permanently next to your address bar.

6 Open it once

Click the ToolHub icon. You should see your trial with seven days remaining. Installation is done.

Please read this one. Never use the **Remove** button on the extensions page. Removing the extension erases its local storage, which resets your trial and disconnects your licence. If you want to stop it temporarily, use the small on/off toggle instead. That keeps everything intact.

Part 2 — Filling your first form

1 Open Form VIII on the PESO portal

Log in and navigate to the form exactly as you always do. The extension only wakes up on PESO pages and does nothing anywhere else.

2 Click the ToolHub icon

A small window opens with five boxes: cylinder size, manufacturing date, tare weight, serial number and vehicle number.

3 Type those five values

Manufacturing date goes in as DD/MM/YYYY. The vehicle number can be typed in any style — spaces, dashes or lower case are all cleaned up automatically.

4 Attach the two photos, if you have them

Cylinder photo and marking photo. Both are compressed to stay under the portal's 100 KB limit, so you do not need a separate image tool.

5 Press Fill

The page is populated in about a second. Test date, last test date, permit date and the registration dropdown are all worked out for you.

6 Check it, then submit it yourself

Read the filled form before submitting. The extension will never press submit for you, by design.

What gets calculated automatically

Field	How it is worked out
Test date	Today's date
Last test date	Exactly three years before today
Permit date	One day after the manufacturing date you entered
Permit number	Generated in the format the portal expects
Registration format	Matched from the vehicle number you typed

Part 3 — Trial and payment

You get seven full days with every feature unlocked. Nothing is charged and no card is stored. When the trial ends the extension stops filling forms and shows a ₹999 button at the bottom of its window.

Press that button and a secure Cashfree page opens. UPI, UPI QR, debit and credit cards, net banking and wallets all work. Your licence switches on by itself, usually within a minute, and you carry on where you left off. Thirty days, one device, and it never renews on its own.

Why payment starts inside the extension. Your licence is locked to this one computer using a key that never leaves it, and that key has to sign the order at the moment you pay. It is the reason nobody else can buy or claim a licence in your name.

Part 4 — If something goes wrong

The extension says it cannot verify the licence

Check your internet connection first, then click Retry. If your office network blocks outside connections, use the Device Help section described below.

Nothing happens when I press Fill

Make sure you are actually on the Form VIII page and that it has finished loading. Refresh the page once and try again.

My trial went back to seven days, or my licence vanished

The extension folder was moved, deleted, or removed and re-added. Message us on Telegram — we can see your original installation on our side and restore it.

Device Help — activating without a working connection

At the bottom of the extension window there is a **Device Help** link. Open it, press **Generate request**, and copy the code it produces. Send that code to our Telegram bot. We reply with an activation code which you paste into the same panel and press **Activate**. This works even when the automatic route is blocked.

Getting help. Open Telegram and search for [@toolHavenhubbot](https://t.me/toolHavenhubbot), or visit t.me/toolHavenhubbot. It handles purchases, activation problems and general questions, and a real person is behind it. You can also email mdua79934@gmail.com if you prefer writing.

Good to know

- Your five entered values stay on your own computer. They are never sent to us.
- The extension only runs on PESO portal pages. It cannot see any other website you visit.
- Card numbers and UPI PINs are handled entirely by Cashfree. We never receive them.
- A short internet outage is fine — there is a twelve-hour offline grace period built in.
- One licence covers one device and is not transferable.

ToolHub is an independent productivity tool and is not affiliated with, endorsed by, or connected to PESO or any government body.

It never submits a form on your behalf. You remain responsible for verifying every detail before submission.
